

WATTEN POWER LIMITED

Modern Slavery & Human Trafficking Statement

Published: 01 May 2025

Financial Year Covered: 2024–2025

Company Number: 17050993

Registered Office: Office 2, 60 Gold Street, Northampton, United Kingdom, NN1 1RS

Contact: info@wattenpower.com

Legal Basis: This statement is made in accordance with Section 54 of the Modern Slavery Act 2015. It sets out the steps taken by Watten Power Limited during the financial year 2025–2026 to prevent modern slavery and human trafficking in our business operations and supply chain.

1. Our Commitment

Watten Power Limited is committed to conducting its business with integrity, transparency, and full respect for human rights. We hold a zero-tolerance position towards all forms of modern slavery, forced labour, human trafficking, servitude, and exploitation — whether within our own organisation or anywhere in our supply chain.

We recognise that the renewable energy and clean technology sector operates within complex global supply chains that may, in certain regions, present elevated risks of labour exploitation and human rights abuses. These risks are taken seriously at every level of our business, and we are committed to taking active, proportionate steps to identify, prevent, and address them.

The forms of exploitation we explicitly prohibit and actively work to prevent include:

- forced, bonded, or compulsory labour in any form
- human trafficking and recruitment through deception or coercion
- child labour and any employment below the applicable minimum working age
- servitude or abuse of power over vulnerable individuals
- withholding of pay, documents, or freedom of movement as a means of control
- unsafe, degrading, or unlawful working conditions

2. About Our Business

Watten Power Limited is a private limited company registered in England and Wales (Company No. 17050993), with its registered office at Office 2, 60 Gold Street, Northampton, NN1 1RS. We are a specialist supplier and installer of clean energy products manufactured by third-party brands. We do not manufacture any of the products we supply.

Our principal activities include:

- supplying solar photovoltaic (PV) systems and panels from Manufacturer partners
- supplying and installing battery energy storage systems
- supplying and installing electric vehicle (EV) charge points
- supplying inverters, cabling, mounting systems, and associated accessories
- delivering professional installation, commissioning, and after-sales support services across the United Kingdom

Our workforce includes directly employed staff and, where required, approved sub-contractors engaged to support installation activities. We serve both residential and commercial customers across the United Kingdom.

3. Our Supply Chain

As a supplier and installer of third-party manufactured products, our supply chain spans multiple tiers and geographies. We do not have direct control over the manufacturing processes of the brands whose products we distribute, but we recognise that this does not diminish our responsibility to understand and address risks within the supply chains we participate in.

Our supply chain encompasses the following categories of supplier and partner:

Supply Chain Category	Examples	Risk Level Indication
Product Manufacturers	Solar panel, inverter, battery, and EV charger brands	Medium to High — global electronics manufacturing
Component and Raw Material Suppliers	Upstream suppliers to our Manufacturer partners	High — may involve mineral extraction and processing
Logistics and Freight Partners	Carriers and distribution companies	Low to Medium
Installation Sub-Contractors	Approved installation and commissioning engineers	Low — based in the UK and vetted by Watten Power
Professional Service Providers	Legal, financial, IT, and administrative suppliers	Low

We acknowledge that the manufacture of electronic components and photovoltaic materials involves global supply chains that may include regions where labour protections are weaker or where exploitation risks are higher. We are committed to increasing our understanding of these risks at each tier of our supply chain.

Elevated Risk Areas: We recognise that the production of solar panels, batteries, and electronic components may involve raw materials — including polysilicon, lithium, cobalt, and copper — sourced from regions where forced labour and poor working conditions have been documented. We actively monitor developments in this area and factor these risks into our supplier relationships and sourcing decisions.

4. Our Policies

Watten Power has established a framework of internal policies that reflect our commitment to ethical business conduct and the prevention of modern slavery throughout our operations and supply chain. Our principal policies in this area are:

4.1 Anti-Slavery and Human Trafficking Policy

This policy sets out Watten Power's absolute prohibition on the use or facilitation of forced labour, child labour, human trafficking, or any form of exploitation in our own operations or within our supply chain. It applies to all employees, contractors, and business partners.

4.2 Supplier Code of Conduct

All suppliers, sub-contractors, installation partners, and distributors engaged by Watten Power are required to operate in accordance with our Supplier Code of Conduct. This Code requires compliance with, as a minimum:

- all applicable local and national labour laws, including minimum wage and working hours legislation
- the prohibition of forced, bonded, or child labour in any form
- provision of safe, hygienic, and dignified working conditions
- freedom of workers to terminate employment without penalty
- prohibition on the retention of identity documents or personal property as a means of control
- fair, transparent, and timely payment of agreed wages
- freedom of association and the right to collective bargaining where permitted by law

4.3 Whistleblowing and Reporting Policy

We maintain a confidential reporting mechanism through which employees, contractors, suppliers, and third parties can raise concerns about suspected modern slavery, labour exploitation, or any other form of unethical conduct without fear of retaliation. Reports may be made to info@wattenpower.com or through any Watten Power manager. All concerns are taken seriously and investigated appropriately.

4.4 Recruitment and Employment Practices

Watten Power is committed to ethical recruitment and fair employment. Our standards include:

- all recruitment is conducted directly or through reputable, vetted recruitment agencies
- workers are never charged fees or deposits in connection with securing employment with us
- right-to-work checks are carried out for all employees in accordance with UK law
- all employees are paid at least the applicable National Living Wage or National Minimum Wage
- employment contracts are provided in writing in a language understood by the worker
- no employee's identity documents, travel documents, or personal property are ever retained by us
- working hours comply with the Working Time Regulations 1998 and any agreed contractual terms

5. Due Diligence

Watten Power takes a risk-based approach to due diligence on modern slavery across its operations and supply chain. Because we are a reseller and installer of third-party manufactured products rather than a direct manufacturer, our ability to audit upstream supply chains is necessarily limited. We compensate for this by engaging with Manufacturers whose own compliance credentials we have assessed, and by escalating our requirements as our business grows.

Our current due diligence activities include:

5.1 Supplier and Manufacturer Assessment

- reviewing available information about each Manufacturer's labour practices, corporate ethics policies, and any publicly reported compliance concerns before entering into a supply relationship
- requesting copies of relevant certifications, audit reports, or third-party assessments from Manufacturers where available

- prioritising engagement with Manufacturers who participate in recognised responsible sourcing schemes or who can demonstrate transparency in their upstream supply chains
- including anti-slavery and ethical conduct requirements in our supplier agreements and purchase terms

5.2 Installation Partner Vetting

- all sub-contractors and installation partners engaged by Watten Power are individually assessed before being approved to work on our behalf
- we verify relevant qualifications, accreditations, and insurance, and require all partners to confirm acceptance of our Supplier Code of Conduct
- we conduct periodic reviews of sub-contractor performance and compliance

5.3 Contractual Protections

- all supplier and sub-contractor agreements include obligations to comply with applicable law, to prohibit modern slavery and forced labour, and to cascade these requirements down their own supply chains
- we reserve the right to terminate any commercial relationship where a breach of these obligations is confirmed

5.4 Ongoing Monitoring

- we monitor publicly available information relating to labour standards and human rights practices in the sectors and regions from which our products originate
- we review and update our due diligence processes annually as part of the preparation of this statement
- we encourage open dialogue with our Manufacturer partners about supply chain transparency and improvement

6. Risk Assessment

We have assessed the potential exposure of our operations and supply chain to modern slavery risks. The following areas have been identified as warranting ongoing attention and proactive management:

Risk Area	Nature of Risk	Mitigation
Global electronics and solar panel manufacturing	Use of labour in regions with weaker protections; documented concerns in polysilicon supply chains	Manufacturer due diligence; preference for certified suppliers
Raw material extraction (lithium, cobalt, silicon)	Mining operations in high-risk jurisdictions; child and forced labour risk	Engagement with Manufacturers on responsible sourcing; monitoring sector developments
Logistics and freight	Use of casual or agency labour; vulnerability of migrant workers	Preferred carriers with published labour standards; Code of Conduct requirements

Risk Area	Nature of Risk	Mitigation
UK-based installation sub-contractors	Use of informal or gangmaster labour; inadequate pay for migrant workers	Individual vetting; qualification checks; Code of Conduct sign-off
Recruitment of own employees	Risk of exploitation through third-party agencies	Vetted agencies only; no worker-paid fees; right-to-work checks

7. Training and Awareness

Watten Power is committed to building awareness of modern slavery risks across our organisation. We recognise that well-informed employees and partners are an essential part of our ability to identify and prevent exploitation.

Training and awareness activities include:

- ensuring all new employees receive induction information covering modern slavery awareness, the indicators of exploitation, and our reporting channels
- providing targeted training to staff involved in procurement, supplier management, and recruitment — the roles most likely to encounter supply chain risks
- briefing installation teams and approved sub-contractors on the indicators of modern slavery in the field, and on their obligation to report concerns
- making our whistleblowing and reporting channels clearly known to all employees and contracted partners
- keeping management and leadership informed of developments in law, best practice, and sector-specific risks relating to modern slavery

As our business grows, we are committed to developing a more structured and comprehensive training programme that reaches all levels of our organisation and partner network.

8. Measuring Our Effectiveness

We monitor the effectiveness of our anti-slavery measures using a range of indicators. These help us assess whether our policies and processes are working and where improvements are needed.

Current key performance indicators include:

- number of supplier agreements incorporating anti-slavery contractual obligations
- number of installation sub-contractors reviewed and holding a signed Supplier Code of Conduct
- completion rates for modern slavery awareness training across relevant staff groups
- number of concerns or reports received through our whistleblowing channel and their outcome
- number of supplier relationships reviewed or terminated as a result of compliance concerns
- extent of Manufacturer engagement on supply chain transparency

Where concerns are raised or breaches identified, we will investigate promptly and take appropriate action, which may include issuing a formal improvement notice, requiring corrective action within a defined timeframe, or terminating the business relationship. We do not accept remediation as a substitute for genuine commitment to ethical conduct.

9. Our Commitments for the Year Ahead

Watten Power is a growing business and we recognise that our approach to modern slavery prevention must develop in line with our scale, complexity, and the expectations placed on responsible businesses. In the financial year ahead, we commit to the following:

- formalising our Supplier Code of Conduct and rolling it out systematically to all active supplier and sub-contractor relationships
- developing a structured modern slavery training module for all staff, with particular focus on procurement and operations teams
- increasing engagement with our Manufacturer partners on supply chain transparency, with a focus on Tier 1 and Tier 2 supply chain visibility
- introducing an annual supplier declaration process requiring Manufacturers and key partners to confirm their compliance with anti-slavery obligations
- reviewing and updating this statement annually in line with our obligations under Section 54 of the Modern Slavery Act 2015
- exploring integration of modern slavery risk assessment into a broader Environmental, Social, and Governance (ESG) reporting framework as the business matures

We are committed to continuous improvement and to being transparent about the progress we make and the challenges we face. We will not claim compliance beyond what our due diligence genuinely supports.

10. Reporting a Concern

If you have reason to suspect that modern slavery, human trafficking, or labour exploitation is taking place — whether within Watten Power's own operations, our supply chain, or in connection with any of our business activities — we urge you to report it.

Reports can be made to Watten Power directly at:

Email: info@wattenpower.com

If you believe someone is in immediate danger or you wish to report a concern to an external body, the following organisations can help:

- Modern Slavery Helpline — 0800 0121 700 (free, 24 hours, confidential) — www.modernslaveryhelpline.org
- National Crime Agency — www.nationalcrimeagency.gov.uk
- Gangmasters and Labour Abuse Authority (GLAA) — 0800 432 0804 — www.glaa.gov.uk
- Police — 999 (emergency) or 101 (non-emergency)

All concerns raised with Watten Power will be treated seriously, handled confidentially, and investigated without delay. We will not penalise anyone for raising a genuine concern in good faith.

11. Statement Approval

This Modern Slavery & Human Trafficking Statement has been reviewed and approved by the Board of Directors of Watten Power Limited. It covers the financial year 2024–2025 and will be reviewed, updated, and re-published annually in accordance with our obligations under the Modern Slavery Act 2015.
