

WATTEN POWER LIMITED

Refunds & Returns Policy

Effective Date: 01 May 2025

Company Number: 17050993

Registered Office: Office 2, 60 Gold Street, Northampton, United Kingdom, NN1 1RS

This Refunds & Returns Policy ("Policy") sets out the rights and obligations of customers who purchase products and installation services from Watten Power Limited ("Watten Power", "we", "us", "our"). It applies to all transactions made through our website at www.wattenpower.com, by telephone, or through any other authorised sales channel.

Watten Power operates as a specialist supplier and installer of products manufactured by third-party brands. We source, sell, and install equipment on behalf of our customers but do not manufacture any of the products we supply. This distinction is important when understanding how product warranties, fault remedies, and returns are handled, and is reflected throughout this Policy.

This Policy should be read alongside our Terms of Sale. Your statutory rights under the Consumer Rights Act 2015 and other applicable UK consumer protection legislation are not limited or excluded by anything in this Policy. Where any conflict arises between this Policy and our Terms of Sale, the Terms of Sale shall prevail.

1. Key Terms

The following terms carry specific meanings throughout this Policy:

Consumer — an individual purchasing products or services for personal, domestic, or non-commercial purposes.

Business Customer — any company, partnership, sole trader, or other entity purchasing products or services for commercial or professional use.

Product — any item supplied by Watten Power, including but not limited to solar panels, battery storage systems, EV charging equipment, inverters, and associated accessories, all of which are manufactured by third-party brands.

Installation Service — the physical commissioning, fitting, electrical connection, and setup of Products carried out by Watten Power or its approved installation partners.

Manufacturer — the third-party company that designed, produced, and warrants the Product supplied by Watten Power.

Manufacturer Warranty — the warranty provided directly by the Manufacturer in respect of defects in materials or workmanship under normal operating conditions, separate from any statutory rights you may hold.

Return Authorisation — the unique reference number issued by Watten Power confirming that a return has been approved, along with the applicable return instructions.

Installed Product — any Product that has been electrically connected, mechanically fixed, commissioned, or activated following delivery, whether by Watten Power, its approved partners, or any third party.

2. Our Role as Supplier and Installer

Watten Power acts as an authorised supplier and professional installer of products manufactured by third-party brands. We source products from reputable manufacturers and take care to work with brands whose quality, performance credentials, and warranty terms we have reviewed.

As a supplier and installer, our responsibilities to you include:

- supplying products that conform to the description, specification, and quality confirmed in your order
- ensuring products are delivered safely and in good condition
- carrying out installation services competently and to applicable industry standards
- supporting you in accessing the Manufacturer Warranty where a product fault arises after installation
- acting as your first point of contact for any concerns, regardless of whether they relate to the product itself or the installation service

Important: Because the products we supply are manufactured by third parties, product warranties are issued and honoured by the relevant Manufacturer, not by Watten Power. However, you should always contact us first — we will manage the process with the Manufacturer on your behalf wherever possible.

3. Consumer Right to Cancel — 14 Day Cooling-Off Period

This section applies to Consumers only. Business Customers do not hold a statutory cooling-off right; their cancellation and return rights are set out in Section 9.

3.1 Your Right to Cancel

As a Consumer, you have the statutory right to cancel your order within 14 calendar days of the date on which you, or a person nominated by you, takes physical possession of the Products, without needing to provide a reason. This right arises under the Consumer Contracts (Information, Cancellation and Additional Charges) Regulations 2013.

Where your order includes both Products and an Installation Service, please be aware that the cooling-off right applies to the Products at the point of delivery. Once installation has taken place, the Products are considered brought into use and the right to return under the cooling-off period no longer applies to those items.

Where an order is fulfilled across multiple deliveries, the 14-day cancellation period begins on the day you receive the final item.

3.2 Cancelling an Installation Service

If you wish to cancel an Installation Service that has not yet commenced, you may do so within 14 calendar days of the date the Contract was formed, in accordance with your statutory rights. If you request that installation begins within the 14-day period and subsequently cancel, you may be charged for any portion of the service already completed.

3.3 How to Exercise Your Right to Cancel

To cancel your order within the cooling-off period, you must notify us in writing before the 14-day window closes. Please send your cancellation notice to:

Email: info@wattenpower.com

Post: Watten Power Limited, Office 2, 60 Gold Street, Northampton, NN1 1RS

Your notice should include your full name, order number, and a clear statement of your intention to cancel. A formal cancellation form is not required, though one can be provided on request.

Please Note: Once a Product has been installed, electrically connected, or commissioned whether by Watten Power, an approved installer, or any other party it is considered brought into use. At that point, the statutory cooling-off right in respect of that Product no longer applies. Do not arrange or proceed with installation until you are certain you wish to keep the Products.

4. Returning Products Before Installation

4.1 Condition of Returned Goods

Following a valid cancellation notice, Products must be returned to us within 14 calendar days. As Watten Power acts as a supplier of third-party manufactured goods, returned Products are subject to assessment before any credit or refund can be applied. To be eligible for a full refund, all returned Products must be:

- completely unused and uninstalled
- returned in their original, undamaged manufacturer packaging with all components, accessories, fixings, and documentation included
- in a clean, resaleable condition with no signs of handling beyond what is necessary to inspect the item
- accompanied by a valid Return Authorisation reference issued by Watten Power

Because our Products are sourced from third-party Manufacturers, items that are returned in a damaged, incomplete, or unsaleable state may not be accepted by the Manufacturer for credit. In such cases, we reserve the right to reduce your refund to reflect the diminution in value, or to decline the return entirely where the product cannot be restocked.

4.2 Obtaining a Return Authorisation

You must contact us before returning any Product. Products sent back without a Return Authorisation may be refused upon receipt and returned to you at your expense.

To request a Return Authorisation, email info@wattenpower.com with the following:

- your full name and contact details
- your order reference number
- the specific Product(s) you wish to return and your reason for returning
- photographs where the return relates to damage or a suspected fault

We will respond with a Return Authorisation reference and full return instructions, including the correct return address.

4.3 Return Shipping Costs

Where you are exercising your cooling-off right on an undamaged, correctly supplied Product, you are responsible for the cost and risk of return shipping. We strongly recommend using a fully tracked and

insured courier service appropriate to the size and value of the items. Watten Power does not accept liability for Products lost or damaged in transit during a customer-arranged return.

Where the return is due to a fault, transit damage, or an error on our part, we will arrange collection at our expense. See Section 5 for further details.

5. Products and Circumstances Not Eligible for Return

The following circumstances fall outside the scope of this Policy's return rights, unless the item is confirmed as faulty or incorrectly supplied:

Exclusion	Reason
Products that have been installed, electrically connected, or commissioned	Once brought into use, a Product is no longer in a resaleable condition and the cooling-off right is exhausted
Products damaged through misuse, incorrect handling, or negligence after delivery	Damage caused by the customer or a non-approved installer is not Watten Power's liability
Special-order, custom-specified, or made-to-measure items	Ordered specifically to your requirements and cannot be returned to the Manufacturer (unless faulty)
Products returned without a prior Return Authorisation	Unauthorised returns cannot be processed and may be returned to the sender at their cost
Activated software licences, digital subscriptions, or access credentials	Digital entitlements are considered consumed upon delivery or activation
Products with broken hygiene or tamper-evident seals	Unsealed items cannot be returned to the Manufacturer for safety and regulatory reasons
Products installed by a party other than Watten Power or its approved partners	Third-party installation may affect both the Manufacturer Warranty and our ability to assess or return the item

6. Faulty, Damaged, or Incorrectly Supplied Products

6.1 Distinguishing Product Faults from Installation Issues

Because Watten Power both supplies and installs third-party products, it is important to understand how different types of issue are handled. The table below provides an overview:

Issue Type	Likely Cause	How It Is Handled
Product arrives damaged or does not match the order	Transit damage or picking/despatch error	Watten Power arranges replacement or refund — report within 48 hours of delivery
Product fails or underperforms after installation under normal use	Manufacturing defect — covered by Manufacturer Warranty	Watten Power raises a warranty claim with the Manufacturer on your behalf
Problem arises from how the product was fitted or commissioned	Installation workmanship — Watten Power's responsibility	Watten Power investigates and remedies at no additional cost to you

Issue Type	Likely Cause	How It Is Handled
Product damaged due to misuse, environmental factors, or third-party interference	Customer or third-party cause	Not covered under this Policy or the Manufacturer Warranty; chargeable repair may be offered

6.2 Reporting a Problem

If you receive a Product that is damaged, defective, or does not match your confirmed order, please notify us as soon as reasonably possible — and ideally within 48 hours of delivery. Early notification helps us act quickly and, where relevant, notify the Manufacturer within their required reporting window.

Please email info@wattenpower.com and include:

- your full name and order reference number
- a description of the issue — whether it is transit damage, a product defect, or a discrepancy with your order
- clear photographs showing the condition of the product and its packaging
- the product serial number, if visible

6.3 Our Response and Remedy

Upon receiving your report, we will acknowledge it and begin our assessment. Depending on the nature of the issue, we may contact the relevant Manufacturer, review the installation records, or arrange an inspection by one of our engineers before confirming the appropriate remedy.

Where a fault or error is confirmed and falls within our responsibility or that of the Manufacturer, we will offer one of the following remedies:

Remedy	When It Applies
Repair	Where the product can be restored to full working order within a reasonable timeframe; may be carried out under the Manufacturer Warranty or by Watten Power's installation team
Replacement	Where the product cannot be economically or practically repaired, or where repair would cause significant inconvenience; subject to Manufacturer availability
Refund	Where repair and replacement are not feasible, or where you are entitled to a refund under your statutory rights under the Consumer Rights Act 2015
Re-installation	Where the issue is attributable to workmanship during the original installation, Watten Power will return to remedy the installation at no cost to you

Where the fault lies with the Product rather than the installation, resolution timescales may depend partly on the Manufacturer's own processes. We will keep you updated throughout and act as your advocate with the Manufacturer where necessary.

6.4 Transit Damage

All Products are packaged for transit by the Manufacturer or our logistics partners. If your delivery arrives with visible external damage to packaging, we recommend noting this with the carrier at the point of

receipt and photographing both the external packaging and the Product before opening. Any internal damage discovered after opening should be reported to us within 48 hours of delivery.

6.5 Statutory Rights

Nothing in this Policy affects your statutory rights as a Consumer. Under the Consumer Rights Act 2015, goods must be of satisfactory quality, fit for purpose, and as described. If they are not, you are entitled to a repair, replacement, or refund from Watten Power as the seller, regardless of whether the defect lies with the Product or any other cause within our responsibility. Your rights against Watten Power as the seller are separate from, and in addition to, any Manufacturer Warranty.

7. Manufacturer Warranties

7.1 How Manufacturer Warranties Work

Every Product we supply is covered by the warranty provided by its Manufacturer. These warranties vary in scope, duration, and terms depending on the product category and brand. Full warranty documentation is included with your product at the time of delivery and/or is available on the relevant Manufacturer's website.

Manufacturer Warranties typically cover:

- defects in materials or components arising under normal operating and environmental conditions
- failures in product performance that fall below the Manufacturer's published specifications
- premature degradation outside the tolerance ranges stated in the product datasheet

7.2 What Manufacturer Warranties Do Not Cover

Standard Manufacturer Warranties generally exclude the following:

- damage resulting from installation by unqualified or non-approved personnel
- faults caused by misuse, neglect, physical impact, or exposure to conditions outside the product's rated parameters
- modifications, repairs, or interventions carried out without the Manufacturer's written consent
- damage caused by power surges, grid instability, lightning, flood, or other external environmental events
- consumable components subject to normal wear and tear over the product's lifetime

7.3 Making a Warranty Claim

If you believe a Product has failed or is performing below the Manufacturer's stated specifications after installation, please contact us in the first instance at info@wattenpower.com. Watten Power will:

- review the reported issue and gather the information required by the Manufacturer
- raise the warranty claim with the Manufacturer on your behalf
- liaise with the Manufacturer's technical team and keep you informed of progress
- coordinate any site visit, engineer assessment, or product collection required by the Manufacturer

Where Watten Power carried out the original installation, we will also assess whether the issue could relate to the installation itself and, if so, take responsibility for remedying it independently of the Manufacturer's process.

7.4 Warranty Claim Timescales

Warranty claim timescales vary by Manufacturer and product type. We will always communicate the expected timeframe to you at the outset of the claim and provide updates where delays arise. Watten Power cannot guarantee Manufacturer response times but will escalate on your behalf where a claim is not being progressed within a reasonable period.

Please Remember: Manufacturer Warranties are in addition to, and do not affect, your statutory rights under the Consumer Rights Act 2015. Even if a warranty claim is declined by a Manufacturer, you may still have rights against Watten Power as the seller of the goods.

8. Refunds

8.1 When a Refund Is Applicable

A refund will be issued by Watten Power in the following circumstances:

- a Consumer has validly exercised their cooling-off cancellation right and the Products have been returned in the condition required under Section 4
- a Product is confirmed as faulty, damaged in transit, or incorrectly supplied and a refund has been agreed as the appropriate remedy under Section 6
- Watten Power cancels an order prior to despatch for reasons within our control
- a Consumer exercises their right to a final-tier refund under the Consumer Rights Act 2015 following an unsuccessful repair or replacement

8.2 Scope of Refund

Subject to the deductions outlined in clause 8.3, a valid refund will include:

- the purchase price of the returned Product(s)
- standard outbound delivery charges where the full order is being returned due to a fault or error on our part

Where a partial order is returned under the cooling-off right, outbound delivery charges will only be refunded if the return relates entirely to a fault or error. Installation Service fees will not be refunded where the installation has already been completed, except where the issue is directly attributable to workmanship failure by Watten Power or its approved partners.

8.3 Deductions

We reserve the right to apply a reasonable deduction from the refund where the value of returned Products has been reduced. This may include:

- handling, fitting, or partial installation marks that go beyond what is needed to inspect the item
- damage to the product or original packaging occurring after delivery
- missing components, accessories, documentation, or original packaging

Any intended deduction will be communicated to you before the refund is processed, along with a clear explanation.

8.4 Refund Timescales and Method

Once returned Products have been received and inspected, or once we have received satisfactory evidence of their return despatch, refunds will be processed within 14 calendar days. Refunds will be issued using the same payment method as the original transaction, unless an alternative arrangement has been agreed in writing.

Please Note: Refunds cannot be processed until returned goods have been received and inspected by us. Please retain your proof of postage or carrier tracking reference until your refund has been confirmed in writing.

9. Business Customer Returns

Business Customers do not hold a statutory cooling-off right and the consumer protections described in Sections 3, 4, and 8 do not apply to commercial transactions. Returns and credits for Business Customers are governed by our Terms of Sale and are subject to the following terms:

- all return requests must be submitted in writing to info@wattenpower.com and are subject to our prior written approval
- a restocking and handling fee of up to 25% of the product value may be applied to approved non-fault returns, reflecting the cost of inspection, repackaging, and return to the Manufacturer
- Products must be returned in original, unused, and undamaged condition with all original packaging, accessories, and documentation
- special-order and custom-specified items will not be accepted for return unless confirmed as faulty or non-conforming to the agreed specification
- any agreed credit or refund will be applied to the account or processed by bank transfer within 30 days of the return being received and approved

Where a Business Customer believes a supplied Product is defective or does not conform to the agreed specification, written notification must be provided to us within 5 working days of delivery. We will investigate and respond with a proposed resolution within a reasonable timeframe.

Business Customers retain the right to pursue warranty claims through Watten Power in the same manner as described in Section 7. We will support Business Customers in accessing Manufacturer Warranties on the same basis.

10. Concerns About Installation Workmanship

If you have a concern that relates specifically to the quality or outcome of an Installation Service carried out by Watten Power or our approved installation partners — rather than to the Product itself — please contact us at info@wattenpower.com as soon as practicable after the issue is identified.

Installation-related concerns may include:

- incorrect or substandard wiring, cabling, or mounting
- non-compliance with applicable installation standards such as BS 7671 or MCS requirements
- failure to commission the system correctly, resulting in underperformance
- damage to property caused during the course of installation

Watten Power takes installation quality seriously and all works are carried out in accordance with applicable UK regulatory standards. Where a valid installation-related concern is raised, we will arrange for an

engineer to attend, assess the installation, and carry out any necessary remedial work at no additional cost to you, provided the concern is not attributable to subsequent third-party interference or misuse.

11. Returns Process — Step by Step

The following summarises the standard process for raising a return or refund request with Watten Power:

1. Contact Watten Power at info@wattenpower.com with your name, order number, the product(s) concerned, and a clear description of the issue. Include photographs where the matter relates to damage or a fault.
2. Await your Return Authorisation reference and return instructions. Do not send any items back until you have received this confirmation in writing.
3. Pack the product(s) securely in original packaging with all accessories and documentation. Write your Return Authorisation reference clearly on the outside of the parcel.
4. Despatch using a tracked and insured service (for consumer cooling-off returns). Retain your proof of postage or carrier tracking reference.
5. Once we receive and inspect the returned items, we will confirm the outcome and arrange your refund, replacement, or repair within 14 calendar days.

Products returned without a valid Return Authorisation reference, or outside the applicable timeframes, may be refused at the point of receipt. In such cases we will contact you to arrange redelivery at your cost.

12. Contact Us

For any questions about this Policy, to raise a return, refund, warranty claim, or installation concern, please get in touch with us:
